

Senior Software Developer Java (m/w/d)

WHAT WE OFFER:

- a successful Software Company with an unique product and leadership within the market
- future driven growing rate
- a modern working environment and a high-skilled Team to develop modern features and products
- short and easy communication ways
- the opportunity to work on forward-thinking software products within the field of automotive
- the opportunity to get in touch with new technologies
- project based or permanent jobs

WHY WE NEED YOU:

- you are responsible for the development of new products such as the continuous development, optimization and testing of consisting products.
- you function as a technical contact for the customer
- you give recommendations for new technologies
- you accompany the implementation of artificial intelligence to make the products even smarter

HOW TO GET IN TOUCH WITH US:

- Your contact person is **Felix Klein**. He has over 5 years of experience and will gladly discuss your application and options in the German market with you.
- Please contact him via felix.klein@b--p.de

WHAT YOU OFFER:

- graduation within the field of informatics or a related degree
- at least 5 years of experience in developing with Java(/EE)
- experience with modern frameworks and programming tools (Maven, Hibernate, Gradle, etc.)
- knowledge concerning the use of Jira and other Logging Tools
- nice to have:
 - knowledge in software-architecture
 - first experiences as a consultant

WHY TALK WITH US?:

- you want to get new experiences within a leading German company
- you don't want to write a standard-classic application
- you want to talk on a technical level – not HR
- you are good in your field and want to progress
- you simply want to start something new

Since over 10 years b+p Beratung und Personal specialised on occupying jobs in the field of informatic. We exclusive serve high potential employers with own IT products or services and a leading role within their field.
